NOTABLE PERSONAL PROJECTS

○ ORTHOPAIGNIA - THESIS PROJECT

Fullstack Developer

2021 - 2022

- Database creation and administration using MySQL and PHP for the back-end part
- Web design and development of a user friendly application
- Developed administrative tools enabling the administrator to extract data in CSV and more

During these projects:

- Architected full-stack solutions for 5 client projects, leveraging **HTML, CSS, React.js** (*front-end*) and **PHP, MySQL, MongoDB** (*back-end*); revamped user interfaces and interactions.
- Directed client partnerships to uncover requirements and provide support within a designated **2-6 month period**, yielding a **20% improvement** in project efficiency and a **35% surge** in client referrals.
- Guided and supervised the progress of **2-3 projects concurrently**, securing delivery and superior quality outcomes, contributing to a **20% increase** in client retention rates.
- Guided clients with ongoing support for at least 2-3 months after the project completion
